Instructions
For this week’s writing assignment, we’re asking you to do a write-up of your presentation topic. In other words, investigate an ethical issue of an emerging/converging technology of your choice and write a one-page essay.

As usual, leverage what you’ve learned in the course and make a strong argument (valid or inductive) supporting your conclusion. Apply the comprehensive method from the textbook to your topic:

1. Identify the practice or feature
   a. Disclose opaque features
   b. Assess sociological implications
   c. Search for existing policies or ethical codes
2. Analyze the ethical issue
   a. Identify any policy vacuums
   b. Clear up conceptual muddles
3. Deliberate on the ethical issue
   a. Apply one or more ethical theories
   b. Justify the position using logical argumentation
