1.) Write a brief outline of your research plan:

   The goal is to understand security, how it's possible to break in an application and ways one can make a product/application secure.

2.) What do you hope to learn and achieve by the end of the semester?

   The most important thing is I want to learn about security and ways you can make your own product as secure as you can. Furthermore, increase my understanding of research and improve my programming skills.
