Mentee Information

Name: Rahul Shah  Date: 9-25-17
NetID: rahuls3  Email: rahuls3@illinois.edu  Year (F, S, J, Sr): S  Major: Computer Science

Mentor Information

Name: Kristen Vaccaro  Date: 9-25-17
NetID: kvaccaro  Email: kvaccaro@illinois.edu  Department: Computer Science
Faculty Advisor: Karrie Karahalios

Fall 2017 Research Plan

1.) Write a brief outline of your research plan:

We will be working to create a web and mobile app that gauges subjects’ comprehension of algorithmic sliders. To do this we will be using ReactJS to create the app and it will have a Twitter-like interface. I think the results will be very interesting and this framework can be used to for many other different experiments.

2.) What do you hope to learn and achieve by the end of the semester?

I really hope that I will learn a good amount about how research is conducted here at UIUC. I also hope that I learn more about how regular people use and interact with computers. This field is very interesting to me and I hope to further pursue it in my academic career. On top of that I also hope that I will be proficient in ReactJS by the end of the semester as employers like to see that skill.
