Mentee Information

Name: Annabelle Shih
NetID: _ayshih2_ Email: _ayshih2@illinois.edu_ Year (F, S, J, Sr): ___S____ Major: ___Computer Science___

Mentor Information

Name: Sneha Krishna Kumaran
NetID: __srkrish____ Email: __srkrish2@illinois.edu_____ Department: ___Computer Science________
Faculty Advisor: ___Professor Brian Bailey____________________

Spring 2018 Research Plan

1) Write a brief outline of your research plan:

Project Description: Getting good feedback from people who are not experts can be difficult. Even when getting feedback from an expert, the receiver of the feedback may not understand it. Educational research has shown that teaching through examples is much more effective than without examples. We will apply this concept to design education by creating a web platform that allows feedback providers to give example-based feedback.

The first step will be to create a user interface that satisfies our goals. We will create low-fidelity prototypes and test our design with users before creating high-fidelity prototypes using the React front-end framework. The second step will be to create the backend of the platform using Node.js.

2) What do you hope to learn and achieve by the end of the semester?

I hope to learn more about HCI, especially since it’s a concentration of computer science I’m interested in.
