Approved Projects

Forming project teams

The projects listed below have been approved. Students should contact the project leader(s) of a project which they are interested in.

Project leaders are usually the students who proposed the idea.

Project leaders can decide to accept/reject students into their teams. Some good reasons for not accepting include:

- Not having the required familiarity with the technology that the team will be using
- Not having a compatible meeting schedule with the rest of the team members
- The team already has 6 members
- The new member would not provide diversity for the team; while the team leaders may prefer to choose students with similar experience as the leaders, you also need some diversity (e.g., if everyone in your team wants to develop but no one wants to manage, test, update Wiki, etc. then your team is not diverse enough and you could have problems)

After you have been accepted into a project team, the project leader will add you as a member for that team below.

Following the team formation deadline noted above, students who have not found a team to join will be randomly assigned. *Do not wait until the last minute!!*

Teams should have exactly 6 members.

Project leaders should create a project page, along with adding a very short project description.

If you are not in a team, please email TA Pranav Garg (NetID: garg11) immediately!
