Formalized in 1973, The Morrill Engineering Program (MEP) was developed to attract and retain aspiring engineers from underrepresented groups in engineering including African Americans, Native Americans, and Latinos/as. Through MEP, students find academic support services and activities, scholarship assistance, work experience, and community.

The mission of the Morrill Engineering Program is to empower African American, Hispanic, and Native American engineering students, support their success as scholars, and leverage a powerful community of students, staff, and alumni to achieve excellence in engineering.

Announcements:

- MEP has a new website: http://publish.illinois.edu/engineering-mep/. Please update your bookmarks!

MEP411: Information Relevant to MEP Engineers!

Check out MEP’s newsletter for more information on the program’s current activities.
