Confluence 6 Upgrade, March 18, 2017

On March 18, 2017 we will be upgrading the software that powers the Illinois Wiki to Confluence 6. This upgrade is required for our software to remain up to date and in a vendor-supported state. The documentation in this area of the Help space will help you understand what is changing with the new version of Confluence. The rest of the documentation will be updated over time to ensure the instructions match the currently installed version of Confluence.
