Math 347 - Spring 2019 - Heleodoro

Welcome to Math 347 - Spring 2019, sections D2 (11 am) and X1 (12 pm).

My name is Aron Heleodoro, this is my second semester as a J. L. Doob Research Assistant Professor at the department.

**Tutoring hours:**

M, T, W, Th 4-6 pm in Atlgeld Hall room 347.

Monday: Yuji Yang, Paul Jones

Tuesday: Mary Angelica Gramcko-Tursi, Fulton Jackson

Wednesday: Mary Angelica Gramcko-Tursi, Yuji Yang

Thursday: Fulton Jackson, Paul Jones

In this wiki you will be able to check our up-to-date schedule and access course material.

In the syllabus page you can find more information about the class.

I will use this moodle to communicate your grades to you. Please check it after each assignment to make sure that your grades are correct. If you notice anything wrong, please contact me as soon as possible so that I can fix it.

This class is probably the first more rigorous and abstract mathematics course you are taking. It is likely to be more challenging than most of the mathematics classes you took so far. If you take it very seriously you will develop skills that will allow you to study mathematics on your own and appropriately profit from higher-level mathematic classes.

**Disclaimer:** Despite the apparent elementary aspect of the material this is *not* an easy class. If you are looking only for a math credit to fulfill a requirement, this class might be the hardest option out there. Most of my previous students said that they underestimated the amount of time necessary to excel in this course.
