IDEALS is the digital repository for research and scholarship - including published and unpublished papers, datasets, video and audio - produced at the University of Illinois. All faculty, staff, and graduate students can deposit into IDEALS. This is a place to find information related to IDEALS, including policies, procedures, guidelines, and help pages.

What is IDEALS?

IDEALS is an institutional repository that collects, disseminates, and provides persistent and reliable access to the research and scholarship of faculty, staff, and students at the University of Illinois at Urbana-Champaign. Faculty, staff, graduate students, and in some cases undergraduate students, can deposit their research and scholarship directly into IDEALS. Departments can use IDEALS to distribute their working papers, technical reports, or other research material. Contact us at https://www.ideals.illinois.edu/feedback for more information.

IDEALS Mission

The Illinois Digital Environment for Access to Learning and Scholarship (IDEALS) is a set of collections and related services that together constitute the campus institutional repository. IDEALS aims to complement traditional scholarly publishing. The IDEALS service preserves and provides persistent and reliable access to the digital works of faculty, staff, and students to give them the greatest possible recognition. IDEALS centralizes the twin goals of access and preservation, as do other institutional repositories, to provide the maximal campus commitment toward achieving these ends.
IDEALS is a service offered through the University Library and CITES under sponsorship of the Office of the Provost.

Technology Platform

IDEALS is currently using DSpace (version 5.x), an open source digital repository developed jointly by the MIT Libraries and the Hewlett-Packard Company.
