The University of Illinois' TechnipFMC Fellowships support masters- and doctoral-level students who are conducting research in areas related to the work of TechnipFMC Technologies, Inc. Targeted areas are Mechanical Engineering, Materials Science, Systems/Analytics, Electrical Engineering, Robotics /Mechatronics, Computer Science, Chemical Engineering, and related areas of study. Preference will be given to students who have research interests in the areas of upstream oil and gas.

TechnipFMC (formally known as “FMC”) is a leading global provider of technology solutions for the energy industry. Named by Fortune Magazine as the “World's Most Admired Oil and Gas Equipment and Service Company” in 2012, TechnipFMC Technologies has approximately 14,900 employees and operates 27 production facilities in 16 countries. TechnipFMC Technologies designs, manufactures and services technologically sophisticated systems and products such as subsea production and processing systems, surface wellhead systems, high pressure fluid control equipment, measurement solutions, and marine loading systems for the oil and gas industry. For more information about TechnipFMC Technologies, click here.

The spirit of the TechnipFMC Fellowship is to support the education of students at the University of Illinois who would be viable candidates for employment at TechnipFMC Technologies, Inc.

The TechnipFMC Educational Fund was established in 1963 by a donation to the University of Illinois Foundation of 15,000 shares of stock in the Link-Belt Company (later acquired by the FMC Corporation) by Bert A. Gayman, an Illinois alumnus.

**Award Amount**

Fellowships offer one year of support. Fellows in doctoral programs will receive a stipend of $25,000, and fellows in master's programs will receive $15,000. Fellows receive full waivers of tuition, service fee, health service fee, AFMFA fee, and libraryfee/IT. Basic dental and vision insurance along with partial payment of the graduate student health insurance fee are also included. Note, however, that students in approved cost-recovery or self-supporting programs are not eligible to receive tuition or fee waivers. This means that students in these programs may apply but, if selected, will receive only the stipend portion of the award.

Students must be nominated by their department, and each department may submit up to six nominations.

See: https://app.grad.illinois.edu/fellowship-finder/index.cfm?action=main.fellowship&fid=2638

**Required Materials:**

1. **Student's current CV/resume.**
2. **Statement of Purpose** (maximum three pages, double-spaced, with one-inch margins, 12 point font, and in Times New Roman). The Statement of Purpose should describe the student's research, including research question (and/or hypothesis or engineering goal), significance, methodology, and preliminary research (if applicable), along with language explaining the relationship of the student's research to the interests of TechnipFMC. The statement must be accessible to readers outside of the applicant's particular area of research.
3. **Letters of Recommendation.** Three letters of recommendation from faculty or professionals.
Materials should be submitted by 11:59PM on Monday, March 11, 2019 to Colin Robertson (2233 SC).

Note: Electronic documents are preferred and should be submitted as PDFs, Word documents, or plain-text files. Students, please include your netid in your file names (e.g. netid_cv.pdf).
